## Upcoming Open Mics

LnL has truly gone “next level” with community engagement! Thank you to all who make these sessions possible and join in the conversation. In the world of type 1 diabetes, community is *everything* and these live, face-to-face opportunities are such a gift!

**Click on graphics for Zoom links!**

### Loop (open Q&A)

**7 September**

**5pm PT 8 pm ET 2 am CET**

### Loop Caregiver

**10 September**

**5pm PT 8 pm ET 2 am CET**

### Q & Aussie

**13 September**

**8 pm AET 12 pm CET 6am ET**

## iAPS Open Mic Videos

We now have a [page on the Loop and Learn website](#) dedicated to these, as well as a dedicated [YouTube playlist](#).

## LnL Group Rules

...have been updated and can be found at the bottom of the [About](#) section of our Facebook group. Of particular interest lately is Rule 2: If a member asks for assistance, any response suggesting or endorsing a Loop service that is not DIY (do it yourself) will be deleted. To be clear, this rule does not impact Nightscout services or commercial looping products. Please see [this important post](#) for more information.

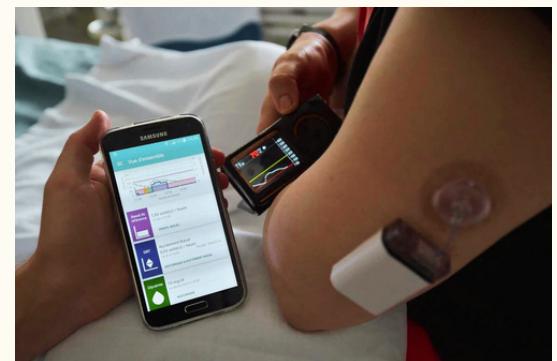

## Starting Loop Playlist: A Request

PLEASE

We have begun a renewed effort to make "starting Loop" easier for new users. [Here's an easy way that you can help](#). Please note that this request is focused on our YouTube channel specifically.

### DIY APS Article in *Nature*

One of our members pointed out [this article](#)- thank you! How exciting to see a DIY APS article in this highly-esteemed scientific journal!

## Check for Updates

... it's an easy way to help keep your Loop running optimally!

### Update Your Apple Developer Agreement

It needs to be done again! Please [update](#) before 12 September... and expect to need to do so again soon. This is especially important for Browser builders, but is also important for Xcode builders.

### from our Facebook Group

Calling attention to a helpful post

How do we handle dosing when we've had a pump failure and aren't sure when it happened?

[See what our experts said.](#)

## International Travelers Using G7: Beware!

If international travelers get logged out of the G7 app (e.g. for G7 update, Dexcom server maintenance, phone malfunction, new phone...), they may not be able to log back in while outside their country of residence. Dexcom uses geolocation for the login process that prevents this. This was reportedly not an issue when the G7 was first released, but has since been implemented by Dexcom.

Ways to circumvent this problem:

- rent the iAnyGo app to change the phone's "location" back to the home country
- if on an Android-based APS, use xDrip+
  - xDrip4iOS does NOT help
